## EXPERIENCE

- 2015-...: **R&D project leader**, RTE (the French Transmission System Operator), Paris, France.
  - Perimeter: computations for the power grid safety from real time to D+1.
  - Resources: around 10 full-time equivalents.
  - 5 European partners: conception and follow-up of technical programs, contract negotiation.
  - Technological transfer: participation to innovation industrialization and to change management.
  - Internal and external communication: organization of a 2-days yearly workshop for 50 persons.
  - Development coordination of automata handling grid congestions with batteries (Ringo project).
- 2012-2015: **Power systems R&D engineer**, RTE, Paris, France.
  - Development of computation modules for the automation of consumption forecasts.
  - Design and implementation of an algorithm that decides the daily price of electricity for 400,000 customers.
  - Realization of an adversarial statistical analysis on demand response base line estimation.
- 2006-2012: **Decision mathematics consultant and Ph.D. student**, Artelys, Paris, France.
  - Task force leader of an expert group studying the impact on power market prices of a new methodology to compute cross-border capacity ("Flow-based") in central western Europe.
  - Development of tools for and realization of economic studies on energetic systems.
  - Development of statistical models for the telecom sector (traffic and call centers).
  - Coordination of the support to the users of a mathematic optimization library.
- 2004-2005: **Ph.D. student**, Serono Genetics Institute and University of Evry, Paris, France.
- 2003-2004 (6 months): **Information system auditor / Intern**, Ernst & Young, Paris, France.
- 2002 (3 months): **Intern**, Atesio and Z.I.B., Berlin, Germany.
- 2000 (9 months): **Army officer**, French army, Rouen, France. Paratrooper training.

## EDUCATION

- 2008: Ph.D. in Computer Sciences, summa cum laude, Université of Evry-Val d'Essonne, France.
- 2004: M.Sc. in mathematics, Ecole Polytechnique and Telecom ParisTech, Paris, France.

## SKILLS

- Computer tools:
  - Matlab, R, SQL, AMPL, Java, Python.
  - Linux (Administration), Office, Latex.
- Language:
  - English (fluent)
  - French (native speaker)
  - German (intermediate)
  - Italian (basic level)

## TEACHING EXPERIENCE

- 2009-...: Power system economics (in English), 12 h, M2 Energy, Ecole Polytechnique and PSL University.
- 2015-...: Definition and organization of an internal training on big data.
